SUMMARY

Full-stack software engineer focused on C#/.NET and React, with experience building production web platforms, secure APIs, databases, and user-facing workflows. Creator of DayhomeFlow, a C#/ASP.NET Core + React app used by real dayhome providers across Calgary, with JWT authentication, EF Core, PostgreSQL, Docker, Excel exports, and production deployment on Render/Vercel.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Python, PHP, Java, C/C++, HTML/CSS, Liquid

Backend: ASP.NET Core, EF Core, REST APIs, JWT, PostgreSQL, SQLite, MVC

Frontend: React, Vite, Axios, Shopify, Liquid, responsive CSS

Tools: Git, Docker, Render, Vercel, Swagger, Firebase, GCP, VS Code, IntelliJ, PyCharm

PROJECTS

DayhomeFlow | C#, ASP.NET Core, EF Core, PostgreSQL, React, TypeScript, Docker, Render, Vercel 2026

- Built and deployed a production childcare management platform used by real dayhome providers across Calgary for child records, attendance tracking, provider details, and monthly invoice exports.
- Developed a secure ASP.NET Core API with JWT authentication, user-owned data access, EF Core migrations, PostgreSQL production storage, SQLite local development, and Swagger docs.
- Built the React/TypeScript frontend with protected routing, attendance workflows, invoice preview, provider settings, and ClosedXML Excel export generation.
- Handled production deployment issues including Docker builds, PostgreSQL migration resets, Render environment variables, CORS, and Vercel routing.

Job Tracker API | C#, ASP.NET Core, Entity Framework Core, SQLite, JWT, Swagger 2026

- Built a secure RESTful API for tracking job applications with JWT register/login, protected CRUD endpoints, DTO validation, search/filtering, and user-owned data access.
- Implemented EF Core migrations, SQLite persistence, Swagger documentation, and clean API structure for backend portfolio review and technical walkthroughs.

EXPERIENCE

Full-Stack Web Developer - IntelliPK 2025 - Present

- Built and launched intellipk.com from 0 to 1 on Shopify for a Pakistan-based water filtration company, creating its first live storefront and online presence.
- Customized Shopify theme sections with Liquid, HTML/CSS, and JavaScript, translating founder requirements into reusable product, service, and business content pages.
- Owned domain setup, store configuration, responsive updates, technical SEO, and ongoing site maintenance to improve credibility, product discovery, and customer trust.

Full-Stack Developer Intern - Self Justice Dec 2024 - May 2025

- Built and maintained backend features for a legal information platform used by 1,500+ users, working in Agile Scrum with JavaScript, REST APIs, and frontend integrations.
- Developed API endpoints and validation logic for legal deadline tracking, helping reduce manual tracking work and improve form completion flow.
- Debugged form-submission and data-processing bottlenecks, reducing processing time by roughly 50%.

Backend Developer Intern - Inwit Jun 2024 - Dec 2024

- Developed backend-driven pages and server-side features in PHP using MVC patterns for a web platform serving about 5,000 monthly users.
- Optimized SQL queries and data access patterns, reducing page load times by about 35%.
- Automated recurring server-side tasks and improved error handling, reducing manual intervention for the team.

EDUCATION & CERTIFICATIONS

University of Calgary - Bachelor of Science in Software Engineering

Calgary, AB | 2025

Foundational C# with Microsoft - freeCodeCamp & Microsoft

2026

LEADERSHIP

Vice President of Finance - Code the Change YYC: Managed budgets, reimbursements, and resource planning for student tech nonprofit events with 300+ participants.
